

On 20th April in 2006 I got acquainted with Kavalkó János and Böhm Maria. Unfortunately I am suffering from very serious illnesses in consequence of an early sport injury. The 'by-products' of these are as for example pathological obesity, high blood pressure and unfortunately skin cancer too. I have visited ORGON-TECH as a worker in TV. I tell the truth, I have seen lots of things in my life so far. Kavalkó János offered his help and gave me an apparatus for trying it out. I think it is the least that I give an account of my experiences on this website. I directed the point of the apparatus toward my ulcerous part of my leg. During the treatment of 15 minutes my numbness was ceasing off. Now I am going to try out all of the possibilities as they are written and I will also give an account of it. If it only takes my pain and numbness away it will be a great thing for me.

Thank you,
Best wishes,
Ferenc
